

En Pointe Technologies Announces Their Diversity Supplier Exchange

New Business Application Helps Companies Reach Their Diversity Spending Goals

Los Angeles, CA – November 18, 2002 – En Pointe Technologies, Inc. (NASDAQ:ENPT), a leading national provider of information technology products and services, recently announced its Diversity Supplier Exchange offering at the 2002 National Minority Supplier Development Council (NMSDC) Conference in Los Angeles, CA. This application is designed to help organizations enhance their supplier diversity purchasing programs.

“En Pointe, as a diversity supplier, understands that diversity-conscious enterprises have specific purchasing goals that sometimes conflict with their B2B initiatives,” stated Robert Turner, Director of Diversity Business Development. “By utilizing our Diversity Supplier Exchange, large buying organizations can maximize their electronic processes to ensure that their diversity spending goals complement their e-Business initiatives.”

With thousands of diversity-owned businesses in the United States, En Pointe addresses the issue many businesses face: how do minority-owned businesses reach out to large corporations and how do those corporations streamline their diversity spending processes?

En Pointe's Diversity Supplier Exchange, powered by ContentWare, a wholly-owned subsidiary of En Pointe, is a robust business-to-business procurement application that helps customers consolidate the purchasing process and make strategic purchasing decisions while reducing the overall cost of doing business. The application consolidates suppliers under one purchasing portal and provides customers access to real-time product information, pricing and availability. Customers can obtain procurement reports, order status and proof of delivery to help manage the procurement process and company assets.
