World Leader in Internet Content Protection Partners With Nationally Recognized VAR to Extend Product Reach

SCOTTS VALLEY, Calif., April 24 /PRNewswire-FirstCall/ -- SurfControl (LSE: [SRF - News](#)), the global leader in Internet protection, today announced a Value Added Reseller (VAR) partnership with Los Angeles-based En Pointe Technologies Inc. (Nasdaq: [ENPT - News](#)), a Microsoft Gold Certified Partner, Large Account Reseller (LAR), enterprise software advisor and leading solutions provider of companies such as Microsoft, Hewlett-Packard, IBM and Cisco.

Expanding Customer Horizons

The addition of SurfControl's technology adds a comprehensive suite of Internet Content Protection to En Pointe's expansive security offerings and provides customers with access to the latest in e-mail, desktop, Web and mobile threat protection.

"The market is saturated with expensive products that offer only limited protection against Internet threats. SurfControl directly addresses these threats through a bundled, innovative, cost-effective solution," said Ali Din, Marketing Director, En Pointe Information Security Services. "As our primary objective is to provide the highest quality and best value in business solutions and services, we are exceptionally pleased to be able to offer SurfControl's award-winning Internet protection suite to our commercial, government and education customers."

"As Internet threats continue to grow in both sophistication and malicious intent there is a clear need for robust, scalable and customizable preventative threat solutions," said David Harris, Vice President of Worldwide Channel at SurfControl. "Leveraging En Pointe's expertise and established customer base, SurfControl can continue to provide best-of-class technology to all sized organizations, meeting both their security and compliance needs. We're confident that our partnership with En Pointe creates a win for both companies, our clients and the industry in general."

About En Pointe Technologies, Inc.
