

En Pointe Providing Microsoft Office 365 Migration Services to the Cloud

Using dinCloud Services, Office 365 Is Now Available in a Hosted Virtual Desktop

LOS ANGELES, CA--(Marketwire - Jun 28, 2011) - En Pointe Technologies, a national solutions provider of information technology products and services, announced it is providing design, consulting, and deployment services for Microsoft Office 365.

These services are part of the Microsoft Center of Excellence that En Pointe established earlier this year. "We want customers to know there is a partner that can help them understand what's included in Office 365 and help them get the technology deployed," commented Ali M. Din, VP of Marketing and Product Development at En Pointe Technologies. "We have seen a lot of pent up demand for Microsoft Office. What is really exciting is that with our dinCloud services, we are extending Office 365 to a Hosted Virtual Desktop too."

On July 7, En Pointe will be hosting a webinar to introduce businesses to Microsoft Office 365 and demonstrate how to migrate to the cloud. Attendees will also be offered a special promotion.

Benefits of the service include flexibility in the 'pay as you go' model; enhanced productivity by always having the latest version of the software; and financial freedom as a capital expenditure changes to an operating expense.

"We have selected En Pointe to be our partner for our Office 365 project. The decision was made based on En Pointe's reputation and knowledge. I also appreciated the value add that En Pointe is including in the subscription price," -- IT Manager of a sustainable packaging company in the Northeast.

"En Pointe continues to be a leader and innovator in the IT solutions provider space," continued Din. "The Microsoft Office 365 deployment team at En Pointe was one of a handful of partners to be part of the Microsoft Office 365 beta program in November of 2010, and has a lot of customers already participating."

A few stats about En Pointe:

- Currently ranked as the #1 Cloud Partner.
- #1 Recommended Office 365 Deployment Partner on Microsoft's Office 365 Beta Marketplace.
- Was also ranked within the Top 12 in the world for BPOS sales in 2010.

En Pointe specializes in Microsoft Exchange 2003, 2007, Novell GroupWise, and IBM Lotus Notes to Microsoft Exchange 2010 migrations whether they are on premise, hosted via Office 365, or hybrid deployments.

"Although we can survive performing day to day email tasks, there are limits to our computer skills. We will need assistance in configuring our computers and migrating our existing domain, so I'm glad En Pointe will be able to help us through this," -- Business Owner from Burlingame, CA.
