Top reasons to make the move to Adobe Creative Suite 4 Design Premium:

Get enhanced and extended versions of essential design tools

Faculty and students can work with the latest feature-packed versions of their favorite design software. They also can take advantage of innovative online services for collaborating, finding inspiration, and mastering career-building design tools, and use Adobe Fireworks® CS4 for fast website prototyping.

Follow streamlined workflows for delivering content across media

Faculty and students can build rich interactive documents by exporting an InDesign layout and adding animation in Adobe Flash® CS4 Professional. Users can prototype websites by opening Photoshop or Illustrator mock-ups in Fireworks CS4 and then embellishing in Flash or publishing in Adobe Dreamweaver® CS4.

Empower students to create mobile designs for millions

Faculty and students can use Adobe Device Central CS4 to easily create, preview, and test mobile content on a wide selection of devices under simulated real-life conditions directly from their desktops.

Work with a convenient, common interface

Adobe Creative Suite 4 Design Premium gives faculty and students improved interface consistency across the components. Users can arrange multiple documents in a single window to compare content or drag-copy objects between them. It's easy to tab through multiple open documents without maximizing each one.

Make everyday tasks even simpler

In Adobe InDesign® CS4, students can easily manage placed files in the customizable Links panel. They can rotate the canvas in Adobe Photoshop® CS4 Extended or the spread in InDesign. It's also easy to combine multiple art boards in a single document in Adobe Illustrator® CS4.

Easily create animation and enhance video

In Flash CS4 Professional, students can create simple but engaging animations in as few as two steps. They can confidently use Photoshop CS4 Extended to enhance video footage, even syncing visual effects to the audio track.

Make quality-testing a natural part of workflows

Everyone can more reliably catch production errors on the fly with Live Preflight in InDesign CS4, preview content under real-world browser conditions with Live View in Dreamweaver CS4, test mobile designs in Device Central, and use enhanced preflight checks and corrections in Adobe Acrobat® 9 Pro.

Access expert resources to enhance teaching and learning

The new Community Help service gives faculty and students access to a wide variety of information — from basic tips to more in-depth help content to community-generated tutorials.
