

AccessPointe Free e-Procurement Website

Connect to all your suppliers through a single interface

AccessPointe is a hosted web based e-Procurement application that provides En Pointe customers an easy to use interface to purchase products through our supply chain.

With the features that our application provides, we will make IT procurement challenges disappear.

Think of AccessPointe as an enormous " virtual warehouse" that provides an electronic portal \$3 billion inventory of IT products.

AccessPointe is integrated to the nation's largest IT distributors and manufacturers, giving customers immediate access to a comprehensive selection of computer and office products.

How it Works

Benefits

- Increase efficiencies by streamlining business processes and avoiding double entry
- Lower acquisition costs through more strategic sourcing and contract management
- Complement internal procurement, sourcing, and asset management applications
- Reduce infrastructure support costs
- Gain access to information with detailed reporting tools and optimize productivity
- Streamline your supplier relationships

AccessPointe Free e-Procurement Website
